inbound connections with the Greater Blue Mountains Drive

There are three information gateways by which people commencing their journey from Sydney can connect with the Greater Blue Mountains Drive:

- the Hawkesbury Valley centre at Clarendon between Windsor and Richmond
- the lower Blue Mountains information centre at Glenbrook and the Mt Annan Botanic Garden – gateway to the Macarthur Region

The easiest way to exit the Sydney urban area and access these gateways is via the Sydney orbital road network. This provides ready 'stop light' access to major regional connecting roads (including Windsor Road shown here). The orbital network comprises sections of freeway and sections of motorway with tolls apply.

Of these sections, four as shown here on the diagram are fully electronic toll roads with no cash booths.

There are several ways of paying the tolls on these roads and it is recommended that you plan your payment option in advance prior to driving on them.

The simplest method of using the orbital road network is to purchase an e-TAG that covers your use of any toll road in Australia. Further details of the e-TAG and e-PASS products can be found online at: www.roamexpress.com.au Alternatively phone: 13 ROAM (13 76 26)

Fully electronic toll road – no cash booths (Westlink M7, Lane Cove Tunnel, Cross City Tunnel & Sydney Harbour Tunnel)
 Road sections where an e-TAG may be used to pay toll
 Road sections where an e-PASS may be used to pay toll (refer opposite for infrequent travel options)

To cover infrequent travel on:

- M2 & Lane Cove Tunnel call Roam Express on 13 76 26
- M7 call Roam on 13 86 55
- Cross City Tunnel and Eastern Distributor call Beep on (02) 9033 3999
